Abstract: In today's healthcare environment, nurses are urged to use up-to-date research evidence to ensure better patient outcomes and inform nursing decisions, actions and interactions with patients. Within the practice setting, there is an increasing challenge to provide care to patients from diverse cultural backgrounds, thereby necessitating transcultural care.
Intellectual disability nursing and transcultural care

Owen Doody and Catriona M Doody

Abstract

In today’s healthcare environment, nurses are urged to use up-to-date research evidence to ensure better patient outcomes and inform nursing decisions, actions and interactions with patients. Within the practice setting, there is an increasing challenge to provide care to patients from minority ethnic groups. In order to deliver care to different cultural groups, nurses need to recognize and empathize with patients’ belief systems, being mindful of their diverse cultural needs. This article presents the concept of transcultural care and identifies issues within intellectual disability nursing through a focus on the components identified by Caminha-Bacote (2002; 2003) and Cortis (2003): cultural awareness, cultural skill, cultural knowledge, cultural encounter and cultural desire. It highlights the issues which are relevant to nursing practice, cultural care and service provision for persons with intellectual disability from ethnic minorities in Ireland.

Key words: Intellectual disability  Transcultural care  Ethnic group  Cultural care  Ireland

The World Health Organization (WHO) (1998) identified that improving health levels of disadvantaged groups should reduce differences in health status between groups in different countries. This statement can be conceptualized within the growing ethnic diversity of many western countries, challenging the adequacy of health professionals’ education and practice the presence of other ethnic groups (Gerrish, 1997; Mitchell et al, 2002). With an increasingly diverse population, it is an ethical imperative to develop the knowledge, expertise and skills necessary to provide culturally competent care (Narayansamy, 1999a; 1999b; Hilgemberg and Schlickau, 2002) and focus nursing on meeting individual patient needs (Narayansamy and White, 2005).

Nurses need to understand and recognize that nursing is not culturally free, but culturally determined, or they risk being guilty of ethnocentrism (Narayansamy, 2003). Effective patient care requires the nurse to be culturally competent and provide care, not solely dependent on ethnic status, but reflective of individual requirements and preferences (Mold et al, 2003). Understanding cultural diversities is essential to safe and effective care, and is an integral part of total health care (Leininger, 1978). A culturally competent nurse performs a nursing assessment using his/her knowledge and communication skills to identify patients’ cultural similarities and differences, and establishes mutual care goals (Gustafson, 2005).

Care is what makes people human; it gives people dignity to humans and inspires unwell individuals to get well. There can be no curing without care, but caring can exist without curing (Leininger and McFarland, 2002). Therefore, nurses need to take responsibility for their own competence and provide cultural care to ethnic groups. This article aims to guide registered intellectual disability nurses (RNIDNs) delivering care to patients from ethnic groups by identifying...

TRANSCULTURAL NURSING: ITS IMPORTANCE IN NURSING PRACTICE

**Abstract (summary)**

Transcultural nursing is an essential aspect of healthcare today. The ever-increasing multicultural population in the United States poses a significant challenge to nurses providing individualized and holistic care to their patients. This requires nurses to recognize and appreciate cultural differences in healthcare values, beliefs, and customs. Nurses must acquire the necessary knowledge and skills in cultural competency. Culturally competent nursing care helps ensure patient satisfaction and positive outcomes. This article discusses changes that are important to transcultural nursing. It identifies factors that define transcultural nursing and analyzes methods to promote culturally competent nursing care. The need for transcultural nursing will continue to be an important aspect in healthcare. Additional nursing research is needed to promote transcultural nursing.
TRANSCULTURAL NURSING: ITS IMPORTANCE IN NURSING PRACTICE

Maier-Lorentz, Madeline M, MSN, RN

Homeopathy and Nursing in Kenya

Nursing Dean of the Faculty of Homeopathy Patricia Domachio describes her recent visit to Kwale, near Mombasa, where a small but determined group of women are training to become homeopathic nurses.

I wasn't overly confident wanting to go to Africa as a child. I do remembers talking about the problems in the world, especially children in Africa, but never having the luxury of seeing the world or making the world better. That sort of changed several years ago when I attended the Faculty of Homeopathy's annual conference, where I listened to a presentation by Owamagbe, a homeopathic doctor. He talked about his work in Ghana, outside the Kruger National Park in South Africa, and the problems his patients had overcome, just to reach the clinic. I realized that I would like to try and become involved in some way. Like many people, after a while I got involved in my work and everyday life, and somehow I forgot about it.

On Monday, I arrived in Kwale, which is a small town in Kwale, where the majority of the health centers in the area use homeopathy. The clinic was founded 5 years ago and now has over 300 clients. The clinic is staffed by 5 homeopathic nurses, all of whom are graduates of the University of Nairobi. The nurses provide primary care to the community, including homeopathic treatment for common ailments. They also provide homeopathic remedies to patients who cannot afford Western medicine. The clinic is open daily from 8am to 5pm.

The clinic is doing great work, but they need more funding to expand. They are currently running on a shoestring budget and could use some help from the outside world. The nurses are trained in homeopathy, but they need more training in other areas, such as nutrition and holistic medicine. The clinic is looking for partners to help them expand their services and provide more training for their nurses. They are also looking for funding to purchase more equipment and supplies.

The nurses are doing great work, but they need more funding to expand. They are currently running on a shoestring budget and could use some help from the outside world. The clinic is open daily from 8am to 5pm.

I found the experience to be very rewarding. The nurses are doing great work, but they need more funding to expand. They are currently running on a shoestring budget and could use some help from the outside world. The clinic is open daily from 8am to 5pm.

In conclusion, the clinic in Kwale is doing great work, but they need more funding to expand. They are currently running on a shoestring budget and could use some help from the outside world. The clinic is open daily from 8am to 5pm.
How to Find Physical and Electronic Copies of Journal Titles

- Check to see if the journal title is owned by Chesnutt Library
  - Check FSU’s Online Library Catalog under Journal Title
  - Check the Title in Journal Finder
- Go to the Periodicals Department
  - 1st Floor for Current Periodicals with titles A-Z
  - 1st Floor for Bound Journals with titles A-B
  - 2nd Floor for Bound Journals with titles C-Z
  - 1st Floor for Newspapers
- Make a note of the format and location
  - Microfiche 1st Floor (File Cabinets Behind the Elevator)
  - Microfilm 1st Floor (Shelves Near the Print Newspapers)
- Printed Indexes are located on the 1st Floor.
Copiers are Available on the 1st, 2nd and 4th Floors and in the Curriculum Lab on the 2nd Floor

- There Is One Color Copier on the First Floor and One in the Media Center on the Second Floor
- Printing or Copying Can Be Done By Entering the Last Six Digits of Your Banner Number, Everything After 830
  - Sending to the print location `\hpss02a\Mono` or `\hpss02a\Color` can print anywhere on campus.
  - Students are allowed 375 pages per semester to print or copy, with the ability to purchase additional copies at the Cashier’s Office and take the receipt to Lyons Science Annex, Computer Lab, Room 125 to get the amount added to their account.
  - The default printing is front/back, unless changed.
- Copies cost $0.09 per page for black and white.
- Copies cost $0.13 per page for color.

- **Copying**
  - Copies can be made from the Microfiche and Microfilm readers onto paper for free.
THANKS!
