Title: Leadership roles and management functions in nursing: theory and application / Bessie L. Marquis, Carol J. Huston
Publisher: Philadelphia: Wolters Kluwer Health/Lippincott Williams & Wilkins, ©2012
Edition: 7th ed
Rating: ★★★☆☆

LOCATION: FSU Main Stacks

STATUS: MISSING

Description: xiv, 624 p. : ill. ; 26 cm
Bibliography: Includes bibliographical references and index

Summary: "Our second book, Retention and Productivity Strategies for Nurse Managers, focused on leadership skills necessary for managers to decrease attrition and increase productivity. This book was directed at the nurse-manager rather than the student. The experience of completing research for the second book, coupled with our clinical observations, compelled us to incorporate more leadership content in our teaching and to write this book. Leadership Roles and Management Functions in Nursing was also influenced by national events in business and finance that led many to believe that a lack of leadership in management was widespread. It became apparent that if managers are to function effectively in the rapidly changing health care industry, enhanced leadership and management skills are needed."--Provided by publisher

Summary: Hundreds of carefully designed exercises along with clear discussions of theory teach nursing students how to integrate effective management skills with expert leadership skills. The authors' experiential learning approach makes it easy to put these skills into practice in any health care setting."
