Gap Analysis: Synergies And Opportunities for Effective Nursing Leadership

Mary Lynn Davis-Ajami
Linda Costa
Susan Kulik

EXECUTIVE SUMMARY

Gap analysis encompasses a comprehensive process to identify, understand, address, and bridge gaps in service delivery and nursing practice.

Conducting gap analysis provides structure to information gathering and the process of finding sustainable solutions to

THERE IS A GAP BETWEEN best evidence and current health care delivery practice resulting in subpar patient safety and quality outcomes. The Institute of Medicine (2001) identifies this gap as a quality chasm in the provision of health care in the United States and presents several challenges and opportunities to improve patient safety and individual care experience, improving population health, and reducing the cost of care (Berwick, Nolan, & Whittington, 2008; Pronovost et al., 2006; Pronovost et al., 2008).

Nursing, as the largest health care workforce involved in direct patient care, is central to the formulation and implementation of effective organizational approaches to address many patient safety
There is a CINAHL Headings Thesaurus to Assist You With the Correct Search Terms to Use in the Database.

Change it to **Term Begins With** Instead of Relevancy Ranked for an Alphabetical Entry Into the Thesaurus.
This is a Search on Leadership. The Thesaurus says for Leadership Styles, Use Management Styles.
When you click on Leadership, you can see it falls under Behavior and Behavior Mechanisms, and then under Intelligence.
By Selecting Leadership, You Can Select It as a Major Subject Heading (MM) and Choose any Subheadings
There are Now 13,456 Records
