Creating conditions for good nursing by attending to the spiritual

Aim To note similarities, differences, and gaps in the literature on good nursing and spiritual care.

Background Good nursing care is essential for meeting patient health needs. With growing recognition of the role of spirituality in health, understanding spiritual care as it relates to good nursing is important, especially as spiritual care has been recognized as the most neglected area of nursing care.

Methods Nursing research, reports and discussion articles from a variety of countries were reviewed on the topics of good nursing, spiritual care and spirituality.

Key issues A nurse’s spirituality and the nurse-patient relationship are integral to spiritual care and good nursing.

Conclusions There are many commonalities between good nursing and spiritual care. Personal attributes of the nurse are described in similar terms in research on spiritual care and good nursing. Professional attributes common to good nursing and spiritual care are the nurse-patient relationship, assessment skills and communication skills.

Implications for nursing management Good nursing through spiritual care is facilitated by personal spirituality, training in spiritual care and a culture that implements changes supportive of spiritual care. Further research is needed to address limitations in the scope of literature.

Treatment for burn blisters: debride or leave intact?

Faye Murphy and Jeshi Amblum discuss the results of a systematic literature review on the categorisation and management of minor burn injuries.

Abstract

This article presents findings from a systematic literature review of whether blisters arising from minor burns should be de-roofed or left intact. It discusses the risks of infection, healing outcomes, discomfort, choice of dressings and costs associated with each method, and reveals that debriding blisters larger than the patient's little fingernail while leaving smaller ones intact is generally agreed to be the best option. The article also explains external factors that influence the choice of whether to debride or leave blisters intact, reviews policy at the trust where one of the authors works in the context of the research and the literature, and concludes that this is a complex decision.

This review explores the literature on whether or not clinicians should de-roof minor burns blisters. The evidence covers all age groups, race and gender of patients and focuses on superficial and partial-thickness burns in normally well people.

Using the search words 'minor burns', 'burns blister', 'management of minor burns', 'de-roofing' and 'debridement', they searched the CINHAL, Ovid, PubMed, Medline, ScienceDirect and Cochrane databases, before filtering out literature published before 1998 unless they were seminal works. The resulting 30 articles cover superficial and partial-thickness burns in usually well patients of both genders, and of all ages and races.

How to Find Physical and Electronic Copies of Journal Titles

- Check to see if the journal title is owned by Chesnutt Library
  - Check FSU’s Online Library Catalog under Journal Title
  - Check the Title in Journal Finder

- Go to the Periodicals Department
  - 1st Floor for Current Periodicals with titles A-Z
  - 1st Floor for Bound Journals with titles A-B
  - 2nd Floor for Bound Journals with titles C-Z
  - 1st Floor for Newspapers

- Make a note of the format and location
  - Microfiche 1st Floor (File Cabinets Behind the Elevator)
  - Microfilm 1st Floor (Shelves Near the Print Newspapers)

- Printed Indexes are located on the 1st Floor.
Copiers are Available on the 1st, 2nd and 4th Floors and in the Curriculum Lab on the 2nd Floor

- There is one color copier on the first floor and one in the Media Center on the second floor.
- Printing or copying can be done by entering the last six digits of your Banner number, everything after 830:
  - Sending to the print location `\hpss02a\Mono` or `\hpss02a\Color` can print anywhere on campus.
  - Students are allowed 375 pages per semester to print or copy, with the ability to purchase additional copies at the Cashier's Office and take the receipt to Lyons Science Annex, Computer Lab, Room 125 to get the amount added to their account.
  - The default printing is front/back, unless changed.
  - Copies cost $0.09 per page for black and white.
  - Copies cost $0.13 per page for color.

- Copying
  - Copies can be made from the Microfiche and Microfilm readers onto paper for free.
